

Smart CareerSphere AI – Your Personal Career Coach

Software Requirements Specification (SRS) v1.0

Technology Stack: MERN + Groq AI | Deployment: Vercel + Render + MongoDB Atlas

1. Introduction

Smart CareerSphere AI is an AI-powered career coaching platform that provides resume analysis, ATS scoring, job description matching, skill-gap analysis, job recommendations, AI mock interviews, and interview feedback.

2. Scope

The system helps candidates from resume optimization to interview preparation and recruitment readiness.

3. Core Modules

- Authentication (JWT, bcrypt)
- Resume Upload & Parsing
- ATS Score Analysis
- Job Description Matching
- Career Recommendations
- AI Mock Interviews
- Interview Evaluation & Feedback
- Dashboard & Reports

4. Technology Stack

Frontend: React, Tailwind CSS, Axios

Backend: Node.js, Express.js

Database: MongoDB Atlas

AI: Groq (Llama / DeepSeek Models)

5. Functional Requirements

Users can register/login, upload resumes, paste job descriptions, receive ATS scores, identify missing skills, get job recommendations, attend AI mock interviews, and receive performance feedback reports.

6. Database Collections

Users, Resumes, JobMatches, Interviews

7. REST APIs
